

2022 Marine Workshop Dealer Guide

Foreword/Introduction

Yamaha is synonymous of performance, quality and reliability - and behind it is a reputation built on years of creating outboard motors and WaveRunner products that incorporate the most advanced and innovative technology. In fact, millions of water sports enthusiasts and professionals around the world choose Yamaha, simply because they know and trust this brand - and because they know we hold the same high standards and care. retail of everything we do. No wonder they also choose Yamaha for their parts and accessories.

Concept of this Guide

This Guide has been prepared by Yamaha to keep you update of the latest components and part numbers and help you to understand the rigging installations for an effective and efficient handling in the repairs creating high customer satisfaction. Most of rigging components are part of a kit, please refer to the diagrams where you can find them depending of application.

Essentials Rigging Components

REMOTE CONTROL CABLES

Only the very best cable performs smoothly and reliably enough to be a match for the renowned quality of a Yamaha Remote Control.

Premium PowerMatched control cable (YPM)

STANDARD CABLE (Y32)

Yamaha offers you a choice of remote control cables that are a perfect match for our controls. These well proven original cables have set the standard with advanced technology that reduces friction and delivers excellent performance. The standard-core wires increase strength and reduce binding, allowing for a 4-inch bend radius.

MID-RANGE CABLE (C8)

This mid-range cable offers great efficiency, thanks to high level of flexibility for a reduced cable bend radius. Featuring stainless steel cables and fittings as well as a very high resistance blue outer jacket for protection against abrasion, UV and chemicals.

PREMIUM POWERMATCHED CONTROL CABLE (YPM)

These are top-of-the-line cables, with features and performance that have made them the first choice of professional riggers. The ultra-low-friction inner core wire has splines and a special cover to reduce contact with the liner, allowing rigging to even tighter tolerances; another benefit is reduced 'play' at the cable ends. We strongly recommend the use of Premium PowerMatched cables for boats with severe applications and long cable lengths, on twin-engine installations - and in fact, on any boat where unrivalled smoothness is required. These cables are designed to run smoothly even if installation demands that curves or a radius be applied within the cable run.

Yamaha recommends YPM cables. If not applicable for rigging certain types of boats, C8 or Y32 cables may be used.

Yamaha Y-COP

Yamaha is introducing a full new Yamaha Y-COP theft-deterrent system. Although it is part of Yamaha's new Drive-by-wire Helm Master EX line-up, it works on boats powered by any EFI Yamaha outboard, even in combination with Yamaha's previous rigging system. Diagrams are available on page 30.

THE NEXT GENERATION IN DIGITAL BOAT CONTROL

We're taking marine technology to the next level with the industry-first and game-changing Yamaha Helm Master[®] EX boat control system.

Helm Master[®] EX is a fully integrated boat control system that makes navigating and getting to your destination easier, and gives you a whole new level of control to precisely manoeuvre your craft.

BETTER CONTROL

One of the key features of Helm Master[®] EX is the suite of built-in Set-Point[®] functions which provide position-hold and drift modes for better control over your craft once you have arrived at your destination.

MULTI-FUNCTION TILLER HANDLE

Our convenient 6X4 Multi-function Tiller Handle is available as an option for mid-range outboard models.

- Ergonomic design and longer, larger-diameter throttle grip
- Contoured, composite-coated lever for smooth, comfortable shifting
- Easy access Power Trim and Tilt switch for on-the-go operation
- Neat and conveniently positioned LED engine warning lamp
- Key switch and STOP switch easily accessible from the handle
- Built-in NEUTRAL switch and buzzer for simple rigging

2 - FITTING KIT

Fitting kits may differ by outboard model, as shown in the table below

1 - TILLER HANDLE - MAIN BODY

Applicable to F20 – F130*

A - Engine start/stop

B - Shift control

C - Variable trolling switch

D - PTT Control

E - Throttle Control

F - Low oil pressure alert

G - Overheat alert

H - Emergency stop lanyard

* F25A/F25D/FT25F are without C/F/G

3 - ENGINE GROMMET

Some outboard models require an engine grommet to fit additional wire leads.

4 - YCOP ATTACHMENT KIT

Required to activate YCOP immobilizer installed with Multifunction Tiller Handle. See page 20 for installation details

How to read the diagram

On this page you will see a visualization of all the components and connections separated by what is mounted at the Console side and the Stern side. Or encase it is a 2nd station what is mounted at the main helm or at the 2nd station.

QUAD LEVEL 3-4 INTEGRATED

IN THIS EXAMPLE INDICATED BY BLOCKS:

1. Quad installation -> 4 engine installation
2. 6X9 new rigging -> in this example a top mount (TM) remote control.
3. CL5 gauge/display -> in this example a CL5 display is used. For other options please see display section. In level 3-4 for map options such as trackpoint a Multifunction display with chart options is required.
4. EKS -> Electronic Key switches. The new 6X9 push button switches are used.
5. Digital electronic steering Integrated -> in this example an engine with build in electronic steering. This can also be Bolt-on electronic steering.
6. Single station -> in this example the main station is displayed
7. HM-EX Joystick / Autopilot -> when expanding from level 1, 2 to 3-4 in the drawing's components are added corresponding to the level.

How to read the parts list

ORDER SUGGESTION:

In the blue box a suggestion is made on what to order in this example for a quad installation level 3-4. It corresponds to all components in the scheme on the left page.

Encase of a 2nd station the components listed are the components to be added at the 2nd station.

The joystick kits needs to be ordered at the local distributor sales department. Other display options may be found in the display options section.

HARNESS OPTIONS:

In the purple box: If in the blue or green box is mentioned "other lengths" available alternative lengths are displayed here. If the boat requires alternative lengths of cables then indicated in the blue box then these part numbers may replace them.

In the kits the lengths cannot be adjusted for longer cables if required they need to be ordered additional.

2ND STATION:

Encase of an 2nd station setup with integrated steering here the location of 2 additional harnesses is shown (gray rectangle) which need to be installed between the Port and Starboard 16 pin harness. These harnesses are then indicated in the blue box (6GR-8258A-V0-00).

MECHANICAL STEERING SYSTEMS

Y12 Helm/Bezel

Y25 Bezel

Y24 Helm/Bezel

Y22 Helm (fast-connect system)

Y23 Helm (non self-centring fast-connect system)

Cable Y11 (M58)
Cable Y21 (M66)

All these systems are highly responsive and are designed and built to our exacting standards of safety, durability and comfort. The Y22 and Y23 helms (or Y20 kit) can be used for all types of applications. Our Y23 helm has a special non self-centring mechanism, which means the wheel won't return automatically to the straight ahead position after a turn. Both these helms have to be installed with a Y25 Bezel, which is available in 20° and 90° versions.

Number of turns lock-to-lock:

Y12 - approx 2.5

Y22/Y23 - approx 3.8

Y24 - approx 3

The Y12 (or Y10 kit) is for smaller boats with engines below 40kW (or below 55hp). Y24 can be applied if a simpler, more conventional system is required.

GENUINE YAMAHA PROPELLERS

SDS PROPELLERS

Yamaha's patented Shift Dampener System (SDS) propellers have been designed to provide 'clunk free' shifting.

The system utilises a specially designed splined rubber hub and spacer to absorb the force transferred to the gear box and propeller when the engine is shifted into forward or reverse. This results in quieter and smoother shifting.

Available for T60 - XT425 outboard models.

Splined Rubber Hub

Helps cushion and quieten shifting forces.

Splined Aft Washer

Specially designed for proper SDS operation.

Propeller Information

THE PROPELLER MAKES ALL THE DIFFERENCE.

If you haven't tried one of Yamaha's comprehensive range of propeller solutions, you're not getting the most out of your outboard. In fact, the right Yamaha propeller can maximize your outboard's acceleration, top speed, fuel economy and lifespan, all while providing a quieter ride and better handling. No matter what your application, there's a genuine Yamaha propeller that can help you achieve peak performance.

PITCH

Pitch is the 'theoretical' distance (in inches) a propeller would travel in one full revolution, if it were travelling through solid matter. A prop with low pitch will deliver better acceleration/hole shot and pushing power but a lower top speed, while a higher pitch prop will provide less thrust, but with a higher top speed. The correct propeller will allow your engine to reach the upper portion of the W-O-T range specified by the manufacturer with a normal-to-heavy load, but without exceeding it. Each inch of pitch is equal to approximately 150 +/- 50 RPM.

DIAMETER

Diameter means the total width of the "circle" at the blade tips as the propeller spins. Larger diameter props push more water and reach deeper down into the water, so they're typically used on large, heavy boats or ones with higher-placed engine mountings. A smaller diameter prop is usually used on lighter boats, where the prop operates closer to the surface of the water - or when you need a higher engine RPM.

NUMBER OF BLADES

Three-bladed propellers are the most common, offering good overall performance, top speed, and efficiency for most applications. While a four-bladed prop will provide increased bow and stern-lift and reduce prop ventilation, this normally means more drag on the engine, resulting in lower top speeds and different handling characteristics.

BLADE GEOMETRY

Blade geometry refers to the actual shape of the blade (or ear). By manipulating the blade's shape, diameter and pitch progression, different performance characteristics can be created for each different type and style of propeller.

Propellers

BLADE SURFACE AREA

Blade surface area refers to the total surface of the blades. The greater the blade surface area, the more water the prop pushes, for better hole shot and increased planing efficiency. However, too much blade area can create significantly more drag, potentially restricting engine RPM and causing negative boat-handling issues.

CUP

Cup is the small curved lip on the blade tip and/or trailing edge. Used in proper amounts, cup helps reduce ventilation and propeller slippage, allowing for higher engine mounting and greater bow lift. However, too much cup may cause excessive steering torque and bow lift - and limit the engine's ability to develop and maintain proper RPM at a certain pitch.

RAKE

Rake is the angle of the blade in relation to the propeller's barrel, or centre, and is expressed in degrees. A high rake propeller is best suited to applications where the engine is mounted high, to help reduce ventilation and increase bow lift. However, too much rake can strain the engine, decrease hole shot and produce negative performance and handling results. A propeller with a low rake angle will cause less strain on the engine, resulting in potentially better hole shot and higher operating rpm at W-O-T.

SDS - SHIFT DAMPENER SYSTEM

Reducing the annoying shift shock and noise normally associated with moving between gears, Yamaha's unique Shift Dampening System (SDS) uses a splined aft washer and a splined rubber hub to absorb noise and vibration. This carefully engineered solution brings smoother, quieter gear shifts.

Series description

ALUMINUM/PLASTIC SERIES

Offering Yamaha design, quality and performance in a low-cost, lightweight propeller. this is a good all-around choice for your Yamaha outboard. Available in a wide variety of sizes and pitches for Yamaha outboards between 2 and 225 horse power, in right-hand and select left-hand rotation.

DUAL THRUST SERIES

Specially designed for sailboats and other large-displacement craft, Yamaha's patented Dual Thrust propellers are built to handle the job of pushing heavy loads through water. The hub is carefully designed to redirect exhaust flow away from the blades, so Dual thrust models cut through "clean water" for higher efficiency and better acceleration.

TALON GP SERIES (WITH SDS)

Designed for outboards from F70 to F130. Our Talon – SDS propeller with our exclusive Shift Dampener System (SDS™) brings a better top speed while offering a comfortable ride. The smooth shifting and quiet, in-gear operation, even at trolling speeds, will be particularly beneficial on smaller, in-line outboards.

TALON SERIES (WITH SDS)

Specially engineered to reduce ventilation and enhance bow lift, Yamaha's TALON aluminum 3-bladed propellers offer excellent holding power in turns, with enhanced "grip" for improved control. In addition, they feature better overall performance and greater cruising efficiency in a planed trim position than conventional 3-bladed aluminum propellers. TALON props are especially effective on mid-sized deep- and mod-V aluminum boats, particularly in applications with the potential for aerated water beneath the boat. The Yamaha SDS mechanism is integrated to reduce shifting vibration and noise. Can be used with standard spacer.

TALON STAINLESS STEEL (WITH SDS)

K-Series Talon Stainless Steel SDS propellers combine quiet, clunk-free shifting and smooth in-gear operation (even at low speeds) with a high-performance, good looking stainless steel propeller – a first for mid-range horsepower outboards. No , medium-sized Aluminium, FRP and RIB boats using Yamaha's F70 up through to the all-new F130A can enjoy the unbeatable combination of smooth and quiet operation with great all-around performance. Just as the Talon Aluminium series, this SDS hub system requires no special hardware to operate.

BLACK STAINLESS STEEL SERIES

An excellent general-purpose choice, these props are made from stainless steel, with a cost-effective black paint coating, allowing for a blade that is thinner, more efficient and more durable than an aluminum propeller. Available in a wide variety of sizes and pitches for Yamaha outboards between 25 and 300 horse power, in right-hand and select left-hand rotation.

RELIANCE SERIES (WITH SDS)

Reliance is CAD-designed to increase performance. Designed primarily for use with Yamaha's F150 and F200 in-line 4 outboards, it also provides excellent all-around performance. Faster at all RPM ranges and having better anti-ventilation characteristics (grip) in most applications than Yamaha's proven Black Stainless Steel props , Reliance Series props are highly-polished stainless steel, featuring impressive cast-in naming on the barrel and excellent corrosion resistance. Now available with Yamaha's exclusive Shift Dampener System (SDS).

SALTWATER SERIES II (WITH SDS)

A powerful choice for today's larger offshore boats, Saltwater Series II propellers are a highly-polished, larger diameter design. Aggressive rake and extra cupping on the blades provide superior midrange fuel efficiency, along with excellent anti-ventilation characteristics. For offshore fishermen, that translates to longer cruising range and better handling in rough seas. Also available with the Yamaha Shift Dampener System (SDS).

SALTWATER SERIES HS4 (WITH SDS)

A polished stainless steel propeller with 4 blades, for certain V6 4-stroke engines. Compared with the conventional 3-bladed propeller, the 4-blade configuration has a larger blade surface area, which can catch much more water and obtain higher thrust performance. As a result, this propeller will obtain better acceleration and be more stable in operation under rough water. However, top speed performance is generally slightly less than a 3-blade design. L/H rotation propellers are available.

Propellers

SALTWATER SERIES XL

A premium prop designed exclusively for the V8 5.3L 4-stroke Yamaha outboards. Designed to harness the awesome power of these engines and convert it into massive amounts of thrust, Saltwater XL propellers have more diameter and 21% more blade area than even our largest Saltwater Series II propellers. This helps the F350 generate up to 45% more thrust than other 250hp-class outboards, and provides large offshore boats with plenty of power to plane quickly, as well as great acceleration and top-end speed. Available with the SDS Shift Dampening System. (Note: deduct two inches of pitch for same or similar performance when converting non-SDS XL propellers to SDS-equipped Saltwater Series XL propellers.)

SALTWATER SERIES XL4 AND XL4-HP (WITH SDS)

Designed exclusively for Yamaha's V8 5.3L F350 outboard, this 4 bladed prop offers incredible thrust and quick-on-the-plane capability, yet with quiet and smooth operation thanks to Yamaha's unique SDS Shift Dampener System. Two XL4 prop types are available: XL4 (15" and 17") designed for very large, heavy offshore boats - and the XL4-HP (22" and 24") designed for lighter, high-performance multi-engined offshore boats.

XTO (SDS) PROPELLERS

With diameters from 16 to 17 1/8 inches and increased blade surface, XTO OS™ propellers are engineered to complement the torque potential of our V8 XTO Offshore™ outboard on 50-foot-plus boats. Features our patented, Shift Dampener System (SDS) for a smoother ride.

XTO EC PROPELLERS

Designed exclusively to help alleviate ventilation that can occasionally occur due to the immense torque potential of Yamaha's revolutionary 5.6L V8 XTO Offshore outboard, XTO EC propellers use large diameter and specially-designed blade surface area to push a large column of water. Additionally, they're designed with extra trailing edge cup to help the blades hold water longer for better grip in applications where ventilation can be an issue. Features our patented, Shift Dampener System (SDS) for a smoother ride.

Essential information

Yamaha is a name synonymous with performance, quality and reliability - and behind it is a reputation earned from years of creating efficient and prepared Authorised Yamaha Dealers with technical expertise.

This section of the Guide only contains the last years models information, but you can find more in other resources that we want to highlight for you.

YSP (Service Portal)

YSP is our Service Portal where you can find information and manuals from all Yamaha models. More importants:

- TSI (Technical Service Information)
- Service Manuals in different languages
- YMAN (Data from diagnosis engine)

YDIS (Diagnostic Tool)

Only exclusive Authorised Yamaha Dealers have access to Yamaha's Diagnostic System (YDIS), allowing for an accurate and comprehensive assessment and diagnosis of the engine. It is the main tool before to proceed with any repair or maintenance!

SST Recommended Manual

This manual contains the recommended Special Tools & Equipment that are needed to work efficiently in Yamaha products.

Warranty

Yamaha Marine Warranty Policy and Operation Manuals, where you can find all the essential information how to treat Marine products in case of a repair, how to submit a warranty claim, Yamaha philosophy, how long is the warranty period, and much more useful information to consider in your daily job.

Yamaha Factory Warranty Conditions are available in Yamaha website:

www.yamaha-motor.eu/gb/en/service-maintenance/yamaha-factory-warranty-marine/#/

PDI (Pre-Delivery Inspection)

PDI documents are prepared per Hp range indicating important points to verify before delivering the product to the end consumer. It is one of the most important tasks to perform to ensure customer safety and high satisfaction.

Owner's Manuals

Indicate to customers where to find this essential information to understand better the usage of the product in safety manner and maintain it properly as factory shows.

www.yamaha-motor.eu/gb/en/services/owner-manual/#/

YPEC (Parts Catalogue)

Yamaha Parts Catalogue is the essential tool to find the correct part number before to order it and avoid errors. We always recommend to use Hull or Engine Number.

Maintenance

Relevant for ALL is to keep track of the proper maintenance and use genuine parts and fluids. To facilitate this task we have in our system different tools.

- DSR (Digital Service Records), easy tool to register the maintenance
- Maintenance Calculator, quotation tool to inform customers
- Maintenance Checksheets, contains:

- 1-2 sheets, depending model and hours, for technician with torque values, liters and part numbers
- 1 visual sheet, to provide to customer with the invoice, it's a quick overview of the job done.

- Unit History Detail, anytime customer can request an overview of all maintenance records.

Marine Technical Guide

This Guide explains the inspection points in an easy-to-understand manner, focusing on 4-stroke outboard motors, in order to re-emphasize the importance of inspection/servicing, and allow customers to use their outboard motors for a long time. It also explains inspection and diagnostic points, including physical phenomena. It examines what problems will occur if these inspections are neglected, and has been created in order to provide a deeper understanding of why inspections are necessary. Personnel at dealerships should read this manual carefully for knowledge on maintenance methods for use with 4-stroke outboard motors, and use it as basic knowledge in order to inform customers of the need for periodic inspections, instruction in carrying out these inspections, and for providing advice on the state and maintenance of these engines based on the results of these inspections.

PIG (Product Information Guide)

PIG's are yearly publications guides which contain the models features, benefits and comparisons with competitors. Easy to read in digital version.

Service Data Handbook

This handy pocket-size guide, contains the tune-up and basic troubleshooting specifications for all models and years of Outboard Motors and WaveRunners.

Yamaha Motor Academy

YME officially launch the Yamaha Motor Academy with a new Learning Experience Platform and extra possibilities for more engagement, better reporting, gamification and an overall improved look and feel.

ANODES

The materials and build quality of a Yamaha engine means it's already highly resistant to corrosion. The addition of a self-sacrificing anode will improve this even further. As a first line of defence, an anode is meant to corrode instead of your engine. It can easily be replaced by another, thereby protecting the engine. However, high-quality Yamaha anodes are more durable than most of their competitors and will need to be changed less often, thereby maximising the protection of your engine.

IMPELLERS

This vital component of the water pump ensures a continuous supply of the correct amount of coolant to the engine. Like all our parts, a Yamaha Impeller is intended for use with a Yamaha engine, so it's advisable to specify one every time it needs replacing.

THERMOSTATS

A thermostat regulates the perfect engine operating temperature. A correctly performing thermostat prevents engine over-cooling which can cause dilution of the oil and reduction of filtration, resulting in greater engine wear.

NGK SPARK PLUGS

These provide the ultimate performance for your engine. They're high-quality, reliable and their advanced materials and design provide superior anti-fouling characteristics, which reduce carbon build-up over a wide heat range. "V Type" plugs include a thin centre electrode tip, which is made of precious metal for added corrosion and oxidation resistance. The result: fast, sure starts and less misfiring, even in the coldest weather.

- Ribbed to eliminate flash-over and improve performance
- Highest quality ceramic insulators improve heat dissipation and electrical insulation to provide long term durability
- More Gaskets for peak performance
- Deep-seated copper core provides maximum engine efficiency at high and low speeds
- Projected insulator precision-engineered to prevent fouling and misfiring
- Nickel alloy tip prevents fouling, maximises performance and extends plug life

OIL FILTERS

The oil filter is an essential component that contributes to the lifetime of the engine. Compromising on the quality or replacement timing of this part may result in serious technical issues and we always recommend the use of a genuine YAMAHA oil filter. Build quality and high filtering power ensure your engine receives the very highest levels of safety.

ENGINE TIMING BELTS

The timing belt is a vital element of your 4-stroke engine, used to synchronize the movement of valves with the pistons. For 2-stroke HPDI with the pistons. For 2-stroke engines the timing belt is used to drive the high pressure fuel pump. The timing belt should be replaced every five years or every 1000 hours of operation (1st maturity reached).

Yamalube lubricants and Careline marine products

FOR THE SMOOTH, LONG TERM RELIABILITY OF YOUR YAMAHA, THERE'S SIMPLY NOTHING BETTER!

Yamalube marine lubricants are specifically formulated for Yamaha outboard engines and personal watercraft - and tested to levels they would never normally experience in the hands of an owner. The result is a smoother, more confident ride every time you hit the water.

QUALITY PROTECTION FOR EXTREME CONDITIONS

Yamalube is designed to work at its best under pressure - the sort it will face every day in powerful Yamaha V8 outboards.

HELPING ENGINES TO LIVE LONGER

By minimizing engineering enemies like spark-plug fouling, ring-sticking and pre-ignition, Yamalube oil protects engines better - for longer

KEEPING YOUR ENGINE CLEANER

The powerful, efficient action of the anti-oxidants in Yamalube marine lubricants keep engine components clean and prevent the formation of sludge.

ANTI-CORROSION AND ANTI-RUST

Special features fight corrosion and rust, ensuring maximum protection of the engine's internal components against the hazards of the marine environment.

YAMALUBE 4-S FULLY SYNTHETIC MARINE OIL

A unique, top-performance marine formula oil, specially developed for high horsepower outboard engines - with the focus on providing improved fuel economy.

FEATURES & BENEFITS

Unique marine formula, compatible with engines with catalytic converters or exhaust gas treatment devices

Provides excellent fuel economy - better than the majority of engine oils in the market

Advanced anti-wear protection for the engine components

Powerful anti-oxidant action to protect engine parts and keep them clean

Unique corrosion inhibitor protects the vital engine parts against the marine environment - both when running and at idle

Keeps the engine ultra-clean and preserves its power

To give your customer the best possible advice, please see the Yamalube application charts.

SPECIFICATIONS

STANDARDS: Approved as FC-W Catalyst Compatible™, a New FC-W Specification, Issued in 2009 by NMMA (National Marine Manufacturers Association) – the only approved 5W30 oil available in the market.

YAMALUBE 4-S SUPER SYNTHETIC MARINE OIL

Very high performance motor oil specially developed for 4-stroke outboard motors.

FEATURES & BENEFITS

Approved in rust test and corrosion standard, as specified by th NMMA

Improved fuel economy

Advanced anti-wear protection

Powerful anti-oxidant action to protect engine parts and keep them clean

Unique corrosion inhibitor protects the vital engine parts against the marine environment - both when running and at idle

Good detergency & dispersancy to clean the engine and preserve its power

Excellent shear stability to ensure good lubrication under all conditions

To give your customer the best possible advice, please see the Yamalube application charts.

YAMALUBE 4-S SYNTHETIC MARINE OIL

This high-performance motor oil, has been developed for 4-stroke outboard motors and 4-stroke Yamaha personal watercraft.

FEATURES & BENEFITS

Good anti-wear protection

Powerful anti-oxidant action to protect engine parts and keep them clean

Long lasting protection against engine stress, resulting in smooth operation of the engine

Improved detergency and dispersancy to keep the engine clean and preserve its power & fuel efficiency

Good anti-corrosion and anti-foaming properties

YAMALUBE 2-W ENGINE OIL

A premium semi-synthetic oil, specially developed, tested and approved by Yamaha for 2-stroke Yamaha personal watercraft engines

FEATURES & BENEFITS

- Low ash minimizes plug fouling and pre-ignition
- Detergent/dispersant formulation to minimise deposits on pistons and cylinder rings
- Good lubricity and anti-scuffing protection for smooth engine operation
- Good anti-corrosion and anti-rust capability
- Reduces production of exhaust smoke
- To give your customer the best possible advice, please see the Yamalube application charts.

YAMALUBE 2-M SUPER ENGINE OIL

High quality special formulation for 2-stroke marine engines. Developed, tested and approved by Yamaha.

FEATURES & BENEFITS

High quality anti-wear formula to protect against piston binding

Enhances the cleanliness of engine components - particularly the piston and exhaust port - and prevents sludge formation

Outstanding anti-corrosion and anti-rust capability to provide protection for the engine components

Low exhaust smoke by burning without leaving sticky deposits

Reduces ring-sticking, spark plug fouling and pre-ignition

Withstands the high temperatures and pressures found in modern engines - low aquatic toxicity

YAMALUBE SAE90 GL5 GEAR OIL

This top-performance gear oil was mainly developed to meet the demands of our V8 F350 outboard engine, and is therefore the natural choice for all sterndrive gear cases. Developed, tested and approved by Yamaha.

FEATURES & BENEFITS

- Extreme pressure and anti-wear properties give good gear performance under heavy loads and repeated shocks.
- Provides very good rust protection against the harsh conditions of the marine environment
- High oxidation stability and thermal resistance helps prevent the formation of deposits around seals
- Smooth, easy gear shifting is ensured, both at high and low temperatures
- Designed to control foaming in the gear case
- Retains viscosity and leaves a protective oil film on all surface
- To give your customer the best possible advice, please see the Yamalube application charts.

YAMALUBE SAE90 GL4 GEAR OIL

A premium quality gear oil developed for all outboard gear cases. Developed, tested and approved by Yamaha.

FEATURES & BENEFITS

- Better cold flow characteristics ensure easier engine startin
- Excellent viscosity stability in use, with reduced friction
- Exceptional anti-wear and anti-corrosion protection to prolong engine life
- Good anti-oxidant action and detergency to protect engine parts and keep them clean
- Strong dispersancy to keep carbon particles in suspension and prevent the build-up of damaging sludge
- To give your customer the best possible advice, please see the Yamalube application charts.

YAMALUBE LICAL GREASE

Premium multi-purpose grease - combining the advantages of both lithium and calcium - dispersed in highly refined base oils. It contains anti-wear and extreme pressure additives, anti-oxidants and corrosion inhibitors. Developed, tested and approved by Yamaha.

FEATURES & BENEFITS

Mixability with almost all other conventional soap greases

Excellent mechanical stability prevents ejection - or losses of consistency - even under severe operating conditions

Very good pumpability

Does not contain lead or other heavy metals considered harmful to health or the environment

Outstanding water-resistance. In fact, no significant change in performance has been observed, even when this grease has been deliberately contaminated with water

Can help to lower maintenance costs

Equivalent to ISO 6743-9: L-XBDHB 2 and DIN 51 502: KP2K – 25 standards

YAMALUBE CONTACT CLEANER

A non-chlorinated degreasing agent which removes persistent dirt, grease and grime from contacts, electrical systems and spark plugs.

FEATURES & BENEFITS

The exclusive formula replaces standard chlorinate-based cleaners and is therefore less aggressive to some plastics.

APPLICATION

Spray from a short distance directly onto dirty areas

Allow approximately 10 seconds to dry

Finish drying off with a rag or compressed air

YAMALUBE PAINT & PLASTIC POLISH

The powered vehicle industry uses more and more high-quality metal, plastic and Perspex parts, treated with different paints, varnish, dyes and finishes. Yamalube Paint & Plastic Polish restores and maintains a deep gloss on almost any smooth surface.

FEATURES & BENEFITS

Removes fine scratches, treats matt areas and revitalises colours

Economical - easy to handle and use

Solvent-free

Water-repellent

APPLICATION

Shake well before use. Apply sparingly with a cloth or polishing swab.

Polish off with a soft polishing cloth

For surfaces on motorcycles and scooters, such as:

- Lacquered metal parts (uni-colour, multi-colour, metallic paints)
- Dyed or varnished smooth plastic parts
- Perspex panels
- Helmet visors
- Airbrushed, weathered or refurbished paint
- Painted rims
- Decorative stickers and decals - it will not remove them

YAMALUBE CARBURETTOR & INJECTOR CLEANER

A powerful formula, specially developed to eliminate deposits and varnish on butterfly valves, throttle chambers, nozzles, tanks, floats, and venturi tubes

FEATURES & BENEFITS

Reduces fuel consumption while increasing engine performance. It also helps the engine idle more evenly and improves acceleration - clean engines last longer too!

APPLICATION

With the engine turned off, disassemble the air filter and spray the Yamalube Carburettor & Injector Cleaner into the air intake pipe

Leave for 10 minutes

Repeat with the engine on, spraying the product directly onto nozzles, throttle-chambers etc.

YAMALUBE CLEANING GEL

This cleaning gel is designed for use on all components to remove dirt, grime and grease quickly and efficiently. Its gentle acid and alkaline-free formula ensures that there's no risk of damage or staining.

FEATURES & BENEFITS

Removes the toughest contaminants actively and without residue

Incorporates anti-corrosion additives

Adheres strongly, even to vertical surfaces

Dries without residue and leaves a lasting shine

APPLICATION

Spray the entire vehicle with Yamalube Cleaning Gel, let it work in for 5 minutes, then rinse down thoroughly with a strong water jet

For extreme contamination (e.g. chain grease or encrusted oil) leave it to work for up to 30 minutes after application before thoroughly rinsing down, until there is no more noticeable foaming - if necessary, a sponge can be used to remove the toughest blemishes or dirt.

Do not use under hot sun or apply to heated surfaces!

YAMALUBE PARTS CLEANER

Yamalube Parts Cleaner is a potent multipurpose degreaser designed to clean and degrease metal parts.

FEATURES & BENEFITS

Brings engine back to its original appearance

Effectively dissolves and removes tar stains, dirty grease, oil, fuel and grime without the need for water

Safe on most rubber, plastic and painted metal surfaces

APPLICATION

YAMALUBE WEATHER PROTECTION SPRAY

Suitable for: Rust and corrosion, caused by wetness and humidity, eat away at metal parts thus reducing its value and appeal. Not many know there is a reliable and effective protection against it. Yamalube Weather Protection Spray protects and prevents metal parts from corrosion.

FEATURES & BENEFITS

With regular use, reliably protects all metal parts of the vehicle against corrosion and stops existing corrosion in its tracks

Forms a "self-healing", transparent protective film that closes immediately again after being touched, making it better than wax

Perfect for winter lay-up to protect against salt

Lubricates and displaces moisture

APPLICATION

Shake the can before use. Only apply the product to clean, dry surfaces

Spray on the product evenly and sparingly, or apply with a soaked cloth, and wipe down with a soft cloth afterwards. For winter lay-up, spray on generously (without wiping)

Tip: The product can be easily removed with Yamalube Cleaning Gel

Note: Do not spray on hot surfaces! Do not spray on brake disks or tyre tread!

YAMALUBE SILICON SPRAY

Black engine parts often suffer from dulling as a result of the harsh environment to which they are exposed and especially from the effect of sun-bleaching. Yamalube Silicon Spray restores and refreshes sun-bleached parts while protecting plastics.

FEATURES & BENEFITS

Yamalube Silicon Spray serves to optically refurbish:

- Greyed and bleached metal motorcycle parts painted or unpainted (e.g. engine block, frame, fork, engine side covers, rims, etc.)

- Rough and varnished plastic and rubber parts (e.g. side panels, inside panels, mudguards, fixtures carbon parts, top case, plastic case, blinkers, mirrors, etc.)

APPLICATION

Wash the vehicle thoroughly with Yamalube Cleaning Gel and then chamois it down

Shake the can well and spray on a thin, even coat from about 20 cm away. Then allow to dry thoroughly

Wipe down any smooth plastic parts, such as linings, with an absorbent cloth after application

Note: To protect surfaces that may not be treated (e.g. tyres, seat, speedometer cover), only apply the product to rims, linings, fittings etc. with a soaked cloth. Do not spray directly onto these parts!
